SUBHANSHU GARG

SOFTWARE DEVELOPER

gargshubhanshu89@gmail.com | +91-7011564838 | linkedin.com/in/subhanshugarg

EXPERIENCE:

Backend Software Developer, Freecharge (A Subsidiary of Axis Bank)   *July 2023 - Present*

- Part of the **DBAT Supernova Team**, responsible for customer onboarding to various Axis Bank products such as Current Accounts, Quick Overdraft, Merchant Cash Advance, etc.
- Implemented and enhanced features using technologies like **Node.js, Express.js, MongoDB ODM, MongoDB, and RESTful web API**s.
- Documented APIs used in Quick Overdraft, a product of Axis Bank, improving transparency and ease of use for stakeholders and reduced onboarding time for teammates .
- Worked with teams to develop user-focused, scalable solutions, enhancing customer experience and business growth.

PERSONAL PROJECTS:

Noticify: Stay Updated with Notices 🗗

Noticify is a dynamic **web application** developed using the **MERN stack**, designed to keep users updated with the latest notices from various organizations.

Key Features:

- **User Registration and Login:** Users can create an account and log in to access the portal.
- **Subscription to Organizations**: Users have the ability to subscribe to different organizations of their interest.
- **Real-time Notice Updates:** Subscribed users receive immediate updates on new notices posted by the administrators of their chosen organizations.
- **Admin Notice Management:** Administrators have the ability to perform **CRUD** (Create, Read, Update, Delete) operations on the notices within their organization.

Technology Stack:

- **Backend:** Node.js and Express.js
- **Database:** MongoDB with Mongoose ODM
- **Frontend:** React.js with Redux-Toolkit for state management

Personal Portfolio Website 🗗

- Created a portfolio website to showcase my professional work and experience online.
- Made with HTML, CSS, JavaScript.
